

ID Type	What we did
11846 User Story	Added daily (at night, actually) synchronization of customer organizations with MSPC - now organization details are ALWAYS up to date. We also uploaded over 10,000 organizations from Eshop and removed some duplicate entries.
12335 User Story	Optimized some scripts for invoice calculations. Probably not something you will immediately feel, but an important step towards automating invoicing process.
12722 User Story	More work towards supporting consumption data for AWS offers. Soon you'll be able to see detailed consumption reports and detailed invoices when buyin and using AWS services.
10896 User Story	Fixe a bug when you sometimes couldn't resend a user invite.
8976 User Story	Added IE11 support for our product management suite.
12261 User Story	Completed second phase of integration of the new login system into the platform. We're already using it in our reseller management and product management suite, now coming soon to your portal! It will bring better stability and performance.
12663 User Story	We made new login pages in our reseller management and product management suite. Not just prettier, but also functional - it uses our new login system. Same coming soon to your portal!
12319 User Story	We documented how our bulk product import in the product management suite works. It will be the basis to creating beautiful knowledgebase articles for everyone who wants to onboard and sell managed services and other offerings.
12556 User Story	It is now easier for us to set up resale contracts for you as a vendor in our product management suite.
12651 User Story	Yet another milestone in building out our offer & price plans configuration features that will be available in future.
12608 User Story	We taught our upcoming offer configuration features to play along with how pricing of product management suite works. No hassle, it's important work behind the scenes.
12814 User Story	Our reseller management suite now has built-in reports. No need to open PowerBI, neat!
12815 User Story	Prepared our reseller management suite for multi-organization use. It's finally coming out!
12789 Bug	Prevented an admin of a certain vendor from seeing the list of all vendors in product management suite.
12656 Bug	Fixed a bug when offers would sometimes lose their images on their way to your screen. All images were returned to their offers unharmed.
12433 Bug	Fixed a rear bug when our product management suite would sometimes forget to load certain sections. Sometimes your newly created add-ons would not allow you to specify prerequisite offers in product
12263 Bug	management suite. Not anymore.
11150 Bug	When you create yourself as a vendor in our product management suite, your short an full organization names will be saved.

12173 Bug

You used to be able to set two different base prices for the same offer during a bulk upload to product management suite. Rest assured, "price discrimination" is strictly prohibited starting today, and machines are no longer confused.

11326 Bug

Search results would sometimes display hidden offers. We fixed that.

12737 Bug

To the very few of you who experienced an error during tenant creation - that will no longer happen.

12370 Bug

Fixed a bug when sometimes select offers could display the wrong retail price.

12679 Bug

Reseller creation is now much more consistent - we squashed a few bugs that would sneak up at inopportune moments.
