

AppXite Platform Release Notes

47, 48 & 49

What's new

This release focuses on improvements to stability & performance and overhauls several key areas for everyday users. Here are some of them:

- Checkout flow
- Editing of subscriptions
- User invitation & logins
- User permissions
- Organization details

Numerous usability tweaks were also introduced to price management, campaigns and catalog management features released thanks to feedback of our valued customers as well as our own Customer Success and Support teams.

Features included in release

ID	Title	Description	Beneficiary
11982	Localize "New tenant created" notification	We added Finnish localization for notifications that are sent in the event of new tenant creation.	Seller
12799	Permissions change for accessing Contracts	Regular Users are no longer able to access Contracts. No changes to other roles introduced.	Seller, customer
12802	AAD as default account/identity provider	We've recently added a way to whitelist identity services for user accounts that are allowed to be invited to your platform. Now we also set AAD as the default option if you haven't configured this in your platform's Settings yet.	Seller, customer
17839	Show reseller T&C to users (show reseller T&C to reseller & user admin roles)	We added an option to require customers to accept terms & conditions (Terms & Conditions) as a seller.	Seller, customer
17590 17589 17588 17693	Buying and managing bundle subscriptions as a customer	We drastically improved how bundles are displayed on storefront, how they are purchased and later on managed by the customer.	Customer
17556	Better support for Nordic languages	We added a lot of extra localization to Norwegian, Swedish, Finnish and Danish.	Seller, customer
17114	Edit subscription without going through checkout	As a part of our bigger overhaul of the checkout process, we also removed the need for the sales person or the customer to go through the cart when editing an existing subscription. Now the order will simply in the background, making this daily action effortless.	Seller, customer

17118	Use of short and full names of organizations	We revised when short and full names of organizations are display to make it more appropriate to specific context in different parts of the platform interface.	Seller
12802 17717	Improvements to product tagging	Tags that you can assign to products now behave more correctly and intuitively.	Seller, customer
12733 17687 11987 11987 17119	Improved user invitation and login experience	We overhauled our user invitation & authentication process from the moment you invite the user to the moment they log in. This involves improvements to permissions management, authentication method management, login screen and more, which are now more functional and intuitive.	Seller, customer
17913 17830 11290	Permissions tweak for viewing Contracts	Ensured that Contracts pages are available to all relevant roles.	Seller

Bugs fixed in this release

ID	Title	Description	Beneficiary
17652	T&C visual glitch on checkout	Sometimes you would see T&C checkboxes not displayed correctly on UI during your checkout. We fixed that.	Customer
10699 17662	CSP Partner Admin permissions	Some CSP Partner Admins were unable to access the new Settings section or reports in certain scenarios. Now everything is working fine for all admins.	Customer
17670	Default quantity for certain offer	In rear cases some users were unable to add an offer to cart due to the correct quantity not reaching the system. We fixed it.	Customer
17689	Editing country in organization profile	We fixed problems some users experienced changing the country in the profile of their organization.	Seller, customer
17715	Invoice correction for frequency change in first month	We improved accuracy of invoices received by sellers by introducing corrections for new edge-cases.	Seller
17546	Wrong time periods for overlapping markups	We noticed and fixed a scenario under which dates for your new markup would not save correctly. It occurred under certain conditions when the new dates overlap with dates of an existing markup.	Seller
17843	Special Price badge tweak	Under certain scenarios, markups you set on offers and mark as "special" wouldn't display a badge to the customer. We made sure it is	Seller, customer
